Aluminum Building Wire Price Increase effective Monday June 12th, 2017

Dear Valued Customer:

Due to a sustained increase in metal prices and eroding marketing conditions, Southwire is announcing an increase of 10% on aluminum building wire products. This increase is intended to protect the value that we and our partners provide to the market. The new 38AC/AR series prices sheets are posted to our website, dated June 12th, 2017. All new orders must be received by the close of business on Friday, June 9th 2017 to receive current 37AC/AR sheet pricing. Please contact your local Southwire representative for more information.

Sincerely,

Jonathan Hendricks
